Experiences

OASIS InfoBYTE - Frontend Intern

- Worked collaboratively with senior developers and designers to develop and maintain the frontend of the OASIS InfoBYTE website, using modern web development tools and technologies such as HTML, CSS, and JavaScript.
- Gained experience working with industry-standard development tools such as Git and VS Code, as well as familiarity with Agile development methodologies.
- Demonstrated excellent problem-solving skills and attention to detail, identifying and fixing bugs and other issues in a timely and efficient manner.

Tech Hack - Founder

Jan 2022 - present

- Founded and managed a Space [Tech-Hack1](#) dedicated to publishing articles on current trends and scenarios in the technology industry. Research and write articles on topics such as Cybersecurity, Artificial Intelligence, Blockchain and Cloud Computing.

Projects

Placement Analyser Web Application :-

- Developed a Web application [Placement Analyser](#) that automates the process of placement management in higher educational institutions.
- Implemented a data cleaning and standardization feature for past placement records, reducing the time and effort required for analysis.
- Created a graphical visualization of placement data to provide insights into placement trends and needs across the institution.
- Utilized data analysis techniques to provide actionable insights for training and placement cells.
- Deployed the application on a web server and provided access to the training and placement cells.
- Collaborated with team members to ensure timely completion of project milestones.

ThiefTracker:

- Developed a platform that leverages real-time theft alerts, geolocation, image recognition, data analytics, and public participation to help police catch thieves.
- Integrated image recognition technology to enable the platform to recognize and track stolen items.
- Utilized data analytics to identify patterns in thefts and provide insights to law enforcement agencies.

Initiatives

- Led a team of volunteers in organizing a community outreach program that provided education and resources to underserved populations.
- Participated in many hackathons to collaborate with peers and build innovative solutions to real-world problems.
- Collaborated with other team members to develop and maintain the college's website using a content management system (CMS).
- Contributed to the development of a social media strategy for the college, increasing engagement with students, faculty, and staff.
