CAREER OBJECTIVE

To enhance my knowledge and capabilities by working in dynamic organization that pried it- Self in giving substantial responsibility to new talent. Energetic and dedicated social professional with superb analytical problem solving and decision making abilities.

PROJECTS

Data Analyst

Amazon sales Data

📅 June - 2023

- Created dynamic, data-driven visualizations with Amazon QuickSight to improve understanding of complex data
- Use data analysis and visualization to identify trends, patterns, and insights which can be used to optimize sales strategies and improve profitability.
- Analyze and visualize key aspects of Amazon's sales data including sales performance by product category, customer segment, region, and sales channel.

Super Market sales Data

Realmart

📅 July - 2023

- The objective of the project is to build a report that provides insights, helps the company to make more informed decisions, and improves its performance.
- Sales data is a critical component of business intelligence, providing insights that can be used to improve performance, increase revenue, and drive growth.
- In the real world, a Data Analyst mostly deals with sales data to help companies in business growth. Therefore, the project involves building a dashboard with our existing supermarket data.
- The challenge is to analyze this data effectively and create a report that provides actionable insights and recommendations for the new branch. For example, we took existing data such as customers, products, quantity, tax, payment, rating, profit, etc. Based on this report, Realmart will open their new branch.

Food Munch

Frontend and Backend

📅 April - 2023

- We can create a responsive web application which runs smoothly across all the devices like desktop, tablet, and mobile.
- responsive Food Munch website using HTML5, CSS3 and Bootstrap Grid System.
- **website :- technagpure.ccbp.tech**
- **technologies :-** such as HTML, CSS and Bootstrap , Javascript .

EDUCATION

B tech

Computer Science (CSE)
