PROJECTS

Portfolio website (09/2021 - 10/2021)

- portfolio website presents our professionalism and dedication to the craft better and more clearly than and CV. we don't just tell, we show actual cases and example which speak volumes. I made this website HTML, CSS and Javascript. it is a responsive and dynamic.

Face Mask Detection (03/2022 - 04/2022)

- It is an API for detecting face mask. In this pandemic situation everyone is need to wear mask. It is necessary for security purposes.
- Face mask detection refers to detect whether a person is wearing a mask or not.
- This API count how many people wearing a mask and how many not and gives an alert message.
- This API can be used in CCTV as well as Entry gate. Who wearing a mask, that can enter otherwise not.

S-HealthPortal (03/2023 - 04/2023)

- The S-Health Portal website, developed using React JS, contains two sections: a Health section and a Placement Preparation section.
- In the Health section, users can access comprehensive information on various health issues and their solutions. In the Placement Preparation section, the website offers a comprehensive platform for users to prepare for interviews and enhance their skills.
- Link - <http://s-healthportal.netlify.app>
