<https://donapattal.com/>

- Donappattal is an eCommerce application built on the Laravel technology stack, designed to provide a seamless and user-friendly online shopping experience. Here is a breakdown of its key features and components:

#### User Registration and Authentication:

Donappattal allows users to create accounts, log in, and manage their profiles. Secure authentication mechanisms are implemented to protect user data.

#### Product Catalog

- The application features a comprehensive product catalog where customers can browse and search for products. Each product is displayed with detailed information, including images, descriptions, prices, and availability.

#### Admin Panel:

The application includes an admin panel accessible only to authorized personnel. Admins can manage products, categories, and inventory. They can also view and process customer orders, manage user accounts, and generate reports.
