Objective

I am looking to appertain my exceptional skills in management by being part of a groundbreaking and innovative company for a year, then eventually switching to a job in development.

Education

- **Hitkarini college of engineering and technology** **2021**
Bachelor of Engineering
first division with honors

Projects

- **Loan Management System**

Services used after disbursement of loan is created and granted by LMS.

I am responsible for the checker page in this system which is used after any service request is generated by maker , checker can accept or decline any service request.

some of the following service request are:-

Foreclosure :-this service request is used to repayment of loan in one go.

Duedate :-this service is used if customer's EMI date is passed and he pays the EMI after the allotted date .

knockoff, closure and etc

service requests are basically the forms which were created with the Material Ui, Json

some of following tools and modules are used in this system are:-

modules:-Axios, redux, Material ui, bootstrap, etc

tools:-VS code, postman, tortoise Git, etc

Internship

- **Associate software engineer at synoriq**

front end developer in react js

responsible for Ui designing

and working of components.
