DEVELOPMENT PROJECTS

Expenses_Tracker

- The Expense Tracker is a web application developed **using React**, a popular **JavaScript library** for building user interfaces. The application aims to provide users with an intuitive and efficient way to track their expenses and gain insights into spending habits. By utilizing React's component-based architecture, the application offers maintainability, scalability, and code reusability. [🔗](#)

Calculator Application [🔗](#)

- In this project,I developed a calculator application using **HTML,CSS** and **JavaScript**. This powerful tool allows you to perform various mathematical calculations quickly and effortlessly. our calculator Key features:Basic arithmetic operations: Addition, subtraction, multiplication, and division.

To DO-List Application [🔗](#)

- I developed a dynamic To-Do List application using **HTML, CSS**, and **JavaScript**. The application allows users to add and manage their tasks effectively. It features a clean and intuitive user interface, making task management a breeze.
- Adding tasks: Users can enter their task description in the input box and click the "Add" button to add it to the list.
- The To-Do List application demonstrates my proficiency in front-end development and my ability to create functional and user-friendly web applications.
