Academic Project

- **Personal Portfolio Website :**   *Jun 2023*
  In this project I will create a personal portfolio website design using HTML CSS and JavaScript. User can use this website to make your online resume or CV. In this website design user will add name, designation of the user. Then user will display the image, skills, work experience and education details. User will also add the list of services and work portfolio on this website. In the footer of this website we will add contact info and contact form. User can receive the contact form data on your google sheets. This website design will be completely responsive for all screen devices like mobile phones.

Other Project

- **Electricity Billing System :**   *Dec* 2023
  Electricity Billing System is a software-based application developed in Java programming language. The main objective is to manage the details of Electricity Bill, Connections, Store Record of Customers. The project aims at serving the department of electricity by computerizing the billing system. It mainly focuses on the calculation of Units consumed during the specified time and the money to be paid to electricity offices. This computerized system will make the overall billing system easy, accessible, comfortable and effective for consumers. Technologies Used: Core Java (Swing AWT) Database Used: MySQL IDE used: Netbeans.
