Skills

- HTML, CSS, BOOTSTRAP, tailwind ,JavaScript, ReactJs, ExpressJs, MongoDb
- SQL
- github, bitbucket

Projects

- **Restaurant management : full stack application with login authentication**
  It is a full stack web application in which There's three panels (admin, manager,user). admin can create a branch and branch manager handle all branches and check Reports branch wise. Manager handle branch billing ,orders,food check branch Report and other.

- **SCOREBOARD**
  It is an application made using HTML, CSS, Javascript and Json fake API.
  It allows users to enter the marks of students along with their names and then we can generate the list of topper students from there

- **TO-DO List using React**
  I made a to-do-list application using ReactJs,expressJs and mongoose to implement the CRUD operations
