PROJECTS

- **HOTEL MANAGEMENT SYSTEM**
  SKILLS:-
  C

  This is a Hotel Management System project, in which we will have the information of the items or rooms that we have, what food items are ordered by the costumers, and how many rooms are allotted to them.
  Also, this project tell us about the sales and the remaining food stock we have in the hotel, and the total collection for the day.

- Online Doctor appointment
  JAVA

  Online Doctor appointment is a smart web application, this provides a registration and login for both doctors and patients. Doctors can register by giving his necessary details like timings, fee, category, etc. After successful registration, the doctor can log in by giving username and password. The doctor can view the booking request by patients and if he accepts the patient requests the status will be shown as booking confirmed to the patient. He can also view the feedback given by the patient. The patients must be registered and log in to book a doctor basing the category and the type of problem patient is facing and the location. The search results will show the list of doctors matching patients required criteria and he can select one and send a request the request will be forwarded to admin and admin forward to doctor and if he is available he will send the confirmation request back to admin the admin update the booking request and says confirmed to the patient. the patient can view the status in the status tab and also he will get the mail saying the booking is Confirmed.

- Netflix Clone
  HTML&CSS

  The purpose of the project entitled as " Netflix Clone " is an on-demand video streaming appsolution that

helps to launch your own-demand OTT platform like Netflix, where you can watch unlimited movies and TV shows for one low month to month cost.
