EXPERIENCE

Coding Ninjas   02/2023 - 05/2023
Teaching Assistant   Remote

- Collaborated closely with students, providing guidance, mentorship, and technical support in web development. Successfully resolved **400 doubts,** showcasing strong problem-solving skills. Received a commendable rating of **4.7** for my outstanding assistance.

SKILLS

Frontend : HTML5, CSS3, JavaScript, SASS / SCSS, ReactJs, Material UI, Bootstrap, Redux Toolkit, Styled components, Webpack

Backend : NodeJS, ExpressJS, JSON Web Token, MongoDB, Github, DSA

PROJECTS

Ecommerce store - Full stack demo

- Developed a full-stack e-commerce application with a feature-rich **shopping cart, product reviews** and **ratings, top products carousel,** and **user profile** with **order history.**
- Implemented robust **admin functionalities,** empowering administrators with seamless **product and user management capabilities.** This includes an **order management system** with an interactive **order details page** and an option to mark orders as delivered, streamlining the order fulfillment process.
- Implemented a secure **user authentication and authorization** system, ensuring only authorized users can access **protected features** and perform actions.
- **Seamless checkout process** with **shipping and payment method** selection, **integrated with PayPal and credit card** payment systems.**Utilized database seeder** to populate the application with sample products and users, enhancing **testing and demonstration** capabilities.
- **Tech-Stack:** HTML5, CSS3, JavaScript, ReactJs, Bootstrap, Redux toolkit, NodeJS, ExpressJS, JWT, MonogoDB.

Social Media Application - Full stack demo

- Implemented a robust user authentication system that enables users to securely **sign up, log in, and log out** of the platform.Developed a dynamic **user feed feature, allowing users to view posts** from other users in real-time.
- Enabled users to personalize their profiles by **uploading profile pictures** and **creating their own posts.** Implemented a comprehensive **friend system, allowing users** to **send and accept friend requests,** fostering connections within the platform.
- Designed an intuitive **user dashboard** where users can efficiently **manage their profiles, posts, and friends.** Enhanced user experience by providing the option to easily **remove friends** from their **friend list.**
- Added engaging features such as the ability to **like posts and comment** on them, fostering interaction and user engagement.
- **Tech-Stack:** HTML5, CSS3, JavaScript, ReactJs, Material UI, Redux toolkit, Redux Thunk, ExpressJS, MongoDB

Real-time Messaging App - Full stack demo

- Developed a robust **real-time chat application** with essential features such as user signup, login, and secure user authentication. Implemented a comprehensive **messaging functionality,** enabling users to seamlessly send messages to each other in real-time.
- Designed the application with a **responsive layout,** ensuring a consistent and user-friendly experience across various devices. Integrated the capability for **users to upload profile pictures,** allowing for personalization and improved user engagement.
- **Tech-Stack:** HTML5, CSS3, JavaScript, ReactJs, Material UI, Redux toolkit, Redux Thunk, ExpressJS, Socket.io, MongoDB
